

RAW MATERIALS

All Raw Materials are Tested

Quality begins with carefully selected and analyzed raw materials.

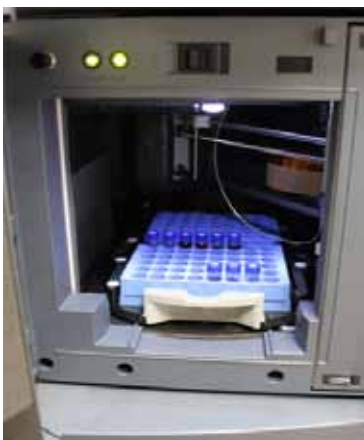

We pre-qualify all of our raw materials suppliers: investigating and auditing their facilities, processes, and standards. With our many years of experience in the industry, we have long-term relationships with the best growers and manufacturers.

Every ingredient must have a certificate of analysis, is quarantined upon arrival at our facilities, and undergoes rigorous inspection before use.

Pictured below is our **High Performance Liquid Chromatography (HPLC)** testing equipment. We use this test, and others, to verify all raw materials for identity, purity, strength, and composition.
